Tornado

BENEFITS

Increases oxygen in water

Greatly reduces the likelihood of algae blooms

Promotes good fish health

Keeps water clearer

Aesthetically pleasing

Improves overall health of water body

WHY AERATION?

Insufficient oxygen in a body of water can cause real problems. From fish deaths to bad smells, algal blooms and more, low oxygen saturation in water can be a recipe for disaster.

The great thing is, it's never been easier to adequately aerate your water. A quality aerator system works by oxygenating your water source, giving your water the refreshment it needs and helping fish to thrive.

The benefits of a Half HP Aeration Fountain are many. Half HP fountains are super-efficient with high flow rates and great economy. The Aqua Control Series II Half HP Aeration Fountains are a great visual feature, all the while clearing up your water and preventing the of harmful algae and other organisms. This fountain is ideal in bodies of water up to half an acre (2,050 m²) in size.

ILLUMINATE DARKNESS - WHITE LED LIGHT KIT

You can now achieve beautiful lighting of your water at night - it's super simple with the LED Lighting Kit which you can purchase with the Half HP Evolution Fountain.
