BENEFITS

Increases oxygen in water

Greatly reduces the likelihood of algae blooms

Promotes good fish health

Keeps water clearer

Aesthetically pleasing

Improves overall health of water body

Crafted in the U.S. from high-strength composite materials, the 2HP Select Series aeration fountains are built to last. These medium-sized fountains don't just deliver a visually striking water display—they actively improve water quality for longer periods.

Engineered to minimize motor stress, they offer reliable performance with low power consumption. High and wide spray patterns provide stunning visual displays suitable for a variety of dam and lake sizes.

Designed for both deep and shallow water, the 2HP Select Series is simple to operate in any condition. Each unit includes a commercial-grade control panel with timers for both lighting and pump operation, giving you effortless control over your water feature.
